Final Term GUI Based Lab
Performance Evaluation

Semester: Spring 2025-2026

CO Assessed: CO3

Total Marks: 20

Student(s) must bring the completed GUI based lab performance evaluation form to participate in the GUI based lab performance evaluation process.

CO3 [PO-h-1]: Determine and validate the appropriate system functional requirements, as well as their design for a real-life based application, in order to facilitate communication and analytical abilities.

Assessment Criteria	Missing/Incorrect (0)	Inadequate (1)	Moderate (2)	Satisfactory (3)	Good (4)	Excellent (5)
GUI Implementation & Usability	No working GUI or entirely incorrect implementation.	GUI is present but lacks usability; poor layout design.	Basic GUI with minimal functionality; user experience is not smooth.	Functional GUI with reasonable usability; proper layout and navigation.	Well-designed GUI with good user experience; interactive elements work smoothly.	Highly intuitive, user-friendly GUI with excellent usability and design.
File Handling & Data Persistence	No file handling or incorrect implementation.	Basic file handling but missing key aspects (e.g., no error handling).	Reads and writes data but lacks efficiency or proper handling.	Reads and writes data efficiently with basic error handling.	Well-implemented file operations with robust error handling and validation.	Optimized file handling with excellent error handling, validation, and data integrity measures.

**The following CO3 and Total Marks sections are to be filled out by the Course Teacher during the GUI based lab performance evaluation period.*

Evaluation period:

SL	Student Name	Student ID	Section	Marks acquired in CO3 (10)		Total Marks Acquired (20)	
			C	Evaluation Criteria			
			Contribution in % Total: 100%	GUI Implementation & Usability (5)	File Handling & Data Persistence (5)	CO3	10
						VIVA	05
						CODE	05
1	Kazi Rowshan Mashfiat	25-63640-3	50	-	-	-	
2	Rakin Rahman	25-63698-3	50	-	-	-	

** Students need to fill out the **Student Name, ID, Section, GUI Based Lab Work Title, Contribution in %, Major Contributed Features, Lab Word Link and the Lab Work Description** in accordance with their own lab work.*

Title	Hungry Tyger (Food ordering System)				
GUI Based Lab Performance Requirements	☐ Encapsulation ☐ Inheritance ☐ Abstraction ☐ Polymorphism	Entity Management ☐ Insert ☐ Update ☐ Get ☐ Delete	☐ Package ☐ Exception Handling ☐ File I/O	GUI Frame ☐ Management Page	
Individual	Student SL-1		Student SL-2		
Major Contributed Features	1. Movie list 2. Navigation Bar 3. BookMark movies 4. Logo image		1. Bookmarks 2. Home 3. Log in 4. MOvie Page 5. Book mark manager

Ranking rangers

Ranking Rangers

A Java Swing desktop application for discovering popular movies, reading their descriptions, and managing a personal watchlist — all with a secure login system.

Features

- Popular Movies Feed — Browse a curated list of trending and top-rated movies pulled live from The Movie Database (TMDB) API.
- Movie Details — View detailed descriptions, ratings, and metadata for each movie.
- Bookmarks — Save your favourite movies to a personal bookmark list for quick access later.
- User Authentication — Register and log in with a personal account to keep your bookmarks tied to your profile.
- Modern UI — Built with Flatlaf for a clean, modern look and feel on top of Java Swing.

Tech Stack

Layer	Technology
Language	Java
UI Framework	Java Swing + Flatlaf 3.7.3
Movie Data	TheMovieDatabase 2.0.0
Environment Config	Spring Boot 3.2.0
Build Tool	Apache Maven

Prerequisites

- Java 11 or higher
- Maven 3.6+
- A free [TMDB API](#) account and access token

Getting Started

1. Clone the repository

```
git clone https://github.com/rain404/ranking-ranger-s.git
```

2. Set up environment variables

Copy the example env file and fill in your TMDB access token:

```
cp .env.example .env
```

Open `.env` and replace the placeholder:

```
TMDB_ACCESS_TOKEN=your-tmdb-access-token
```

You can obtain a free access token from the [TMDB API settings page](#).

3. Build the project

```
mvn package
```

This produces a self-contained JAR in the `target/` directory.

4. Run the application

```
java -jar target/ranking-rangers-1.0-SNAPSHOT-jar-with-dependencies.jar
```

Usage

- Register / Log In — Create an account or sign in with existing credentials on the login screen.
- Browse Movies — The home screen displays a list of currently popular movies fetched from TMDB.
- View Details — Click on any movie to see its full description, release date, and rating.
- Bookmark — Hit the bookmark button on any movie card to save it to your personal list.
- View Bookmarks — Access all your saved movies from the bookmarks section.
